WORK EXPERIENCE

Special Man Global Solutions Limited // Hybrid (Lagos, Nigeria)
Frontend Engineer (Contract) • February 2023 – April 2023

- Worked in an agile-driven environment collaborating with another frontend developer to build client products, transforming high-fidelity Figma designs to responsive UI.
- Lead developer role on an insurance agent portal project.
- Improved developer experience and code quality by creating and documenting a highly reusable and customizable internal component library.
- Improved accessibility and inclusiveness of the web-based application by writing components and entire pages to meet modern accessibility standards.

Technologies: Vue.js (Nuxt.js), Tailwind CSS, TypeScript.

Volument Inc. // Remote (Helsinki, Finland)
Frontend Engineer • March 2022 – October 2022

🔗 volument.com/demo
- Played a critical role as the lead front-end developer in launching the web product for the startup in an agile-driven environment. Working closely with the team, we were able to successfully bring the product to market while adhering to strict timelines and focusing on quality and customer satisfaction.
- Built an analytics dashboard app in three incremental iterations, allowing stakeholders to progressively review and conduct user research to improve the app and optimize user experience at each stage.
- Wrote performant code for aggregating and normalizing data sourced from the backend REST API and used this for effectively rendering the app and it's various charts and data visualizations based on user selected options.
- Created and documented a highly reusable and customizable internal component library which sped up development time and would be used in subsequent development.

Technologies: Vue.js (Pinia), Sass, JavaScript.

Sekeido Digital Agency // Remote (Hamburg, Germany)
Freelance Frontend Developer • May 2022 – June 2022

- Implemented the website design with the client for the German branch of the Ferrero company.

Technologies: Sass, Blade (PHP), JavaScript.

Townsmeet // Remote (Calabar, Nigeria)
Frontend Developer • January 2022 – March 2022

- Worked as part of a team of four front-end developers to build the web platform for a social media app, converting Figma designs to responsive UI.
- I specifically worked on user profiles

Technologies: Tailwind CSS, Vue.js (Nuxt.js), JavaScript.
