Eduek Akpan-Nyah

FRONTEND SOFTWARE ENGINEER

WORK EXPERIENCE

Frontend Engineer / Special Man Global Solutions Limited

02/2023 – 04/2023 • Hybrid (Lagos, Nigeria)

- Worked in an agile-driven environment collaborating with another developer to build client products, transforming high-fidelity Figma designs to responsive UI.
- Lead developer role on an insurance agent portal project.
- Improved developer experience and code quality by creating and documenting a highly reusable and customizable internal components.
- Improved accessibility and inclusiveness of the web-based application by writing components and entire pages to meet modern accessibility standards.

Technologies: Vue.js (Nuxt.js), Tailwind CSS, TypeScript.

Frontend Engineer (Contract) / Volument Inc.

03/2022 – 10/2022 • Remote (Helsinki, Finland)

🔗 volument.com/demo

- As the lead front-end developer, I played a critical role in launching a web-based product for the startup in an agile-driven environment. Working closely with the team, we were able to successfully bring the product to market while adhering to strict timelines and focusing on quality and innovation.
- In three incremental iterations, I built an analytics dashboard app allowing stakeholders to progressively review and conduct user research to improve the app and optimize user experience at each stage.
- Wrote performant code for aggregating and normalizing data sourced from the backend REST API and used this for effectively rendering the app and it's various charts and visualizations based on user selected options.
- Created and documented a highly reusable and customizable internal component library which sped up development time and would be used in subsequent development.

Technologies: Vue.js & Pinia, Sass, JavaScript.

Freelance Frontend Developer / Sekeido Digital Agency

05/2022 – 06/2022 • Remote (Hamburg, Germany)

- Implemented the website design with the client for the German branch of the Ferrero company.

Technologies: Sass, Blade (PHP), JavaScript.

Frontend Developer / Townsmeet

01/2022 – 03/2022 • Remote (Calabar, Nigeria)

- Worked as part of a team of front-end developers to build the web platform for a social media app, focusing on user profiles.
- Converted Figma designs to responsive UI.

Technologies: Tailwind CSS, Vue.js (Nuxt.js), JavaScript.

EDUCATION

B.Sc., Computer Science with Mathematics.

03/2019 – 12/2023

Obafemi Awolowo University (OAU), Ile-Ife.

- Core Team Member – Open Source Community Africa (OSCA), Ile-Ife.
- Member – Google Developer Students Club (DSC), OAU Chapter.
- Campus Ambassador – Cowrywise.

TECHNICAL SKILLS

HTML5 / CSS3 (Sass, SCSS, Tailwind CSS). JavaScript (ES6+), TypeScript. Vue.js (Nuxt.js, Pinia, Vuex). React.js. Testing (Vitest). APIs (RESTful API, GraphQL). Technical & Content Writing.

TOOLS AND TECHNOLOGIES

Vite. Figma. Notion. Docker. Webpack. Git & GitHub.
